Low-Code / No-Code Center of Excellence (CoE)

Make low-code/no-code safe, scalable, and successful.

A CoE turns low-code/no-code from "wild west" app sprawl into a reliable way to ship value fast. If projects drag on for months, teams aren't on the same page, status is unclear, or you can't answer security/audit questions, a CoE adds the guardrails, playbooks, and people enablement to fix it.

Assess. Formalize. Scale.

- **Assess**

  Quick discovery of policies, governance, and your LCNC app inventory.
  Results: a clear readiness score and your top quick wins.

- **Formalize**

  Choose an operating model, set simple standards, intake/release steps, and KPIs.
  Results: a practical governance playbook and ready-to-use templates

- **Enable and Scale**

  Pilot and phased rollout with a centralized backlog, success metrics, and role-based training/accelerators.
  Results: a live pilot and a phased roadmap that ships value first.

Recent Outcomes

- Reduced security risks and total cost of ownership for LCNC solutions.
- Improved product quality through standardized best practices and on-demand support.
- Increased knowledge sharing and cross-agency collaboration.
- Accelerated value delivery and responsiveness to agency needs.
- Established a scalable and secure technical architecture for LCNC development.
- Delivered measurable business value through improved data sharing, decision support, and operational efficiency.
- Positioned agency as a hub for LCNC innovation
