

Unlock the Value of AI

Tap into assistive AI to reduce manual lift, sharpen accuracy, and speed delivery across discovery, development, and QA. Take advantage of industry leading AI tools to boost productivity, preserve knowledge, and scale capabilities.

Built-In. Not Bolted On.

Our accelerators embed directly into your teams' existing processes — no rip-and-replace. Through guided training, applied pilots, and custom AI tools, we empower your people to get real results within weeks.

AI Supported Discovery

Accelerate requirement gathering with AI that analyzes transcripts, notes, and inputs to generate clear, complete documentation. Automate story creation, spot gaps, and reduce manual effort — enabling faster iteration, stronger stakeholder engagement, and better traceability.

AI Coding Assistant

Boost development with AI that generates boilerplate code, refactors legacy systems, and creates clear documentation. Real-time insights, explanations, and performance suggestions enhance productivity, consistency, and code quality — reducing rework and accelerating delivery.

AI Supported QA

Automate test case generation, scripting, and defect prediction with machine learning and NLP to reduce manual effort while boosting coverage, accuracy, and detection speed. Achieve a more efficient, scalable QA process with fewer production issues and faster delivery.

AI OCM

Drive adoption of Generative AI tools through training, communication, and feedback to embed AI into daily operations and align with business goals, user needs, and culture.

Partnership That Powers Progress

We don't just implement AI — we co-create with you. Our **One Team Approach** and the **eImagine Trust Advantage (eTA)** ensure you get transparent delivery, measurable outcomes, and real alignment from day one.

Proven Results Across Services

- 25% projected efficiency gain from updated AI-based task estimates
- 26% average time saved across all tasks using GitHub Copilot
- Raised user story accuracy to 90%
- Reduced time spent on test case creation by 80%
- Reduced manual effort and rework
- Seamless integration into existing workflows
- Enhanced stakeholder engagement

Ready to Activate AI in Your Organization?

Let's accelerate your path to better outcomes — with less effort. Whether you're looking to streamline discovery, boost developer efficiency, or elevate software quality, eImagine's AI Enablement solutions deliver measurable impact in weeks.

Connect with us today. Reach out to ai@eImagine.com to kick off your planning conversation today.
